 You must specify one of the following options.
 1 Horizontal load magnitude and direction
 2 Horizontal displacement and direction
 3 Buoy X and Z coordinates
 4 None (system solution) is
 The other values will be solved

Which option do you want to specify (1, 2, 3, or 4) (unitless)?

1 Enter magnitude of horizontal load (H) (kilopounds)

2 Enter angle from neutral direction to horizontal load vector (degrees)

3 Do you want to see parameter list again?
YES

ADDITION: Data can be keyed in, as well as read from a file. Query about type of data input occurs between (G4) and E1.

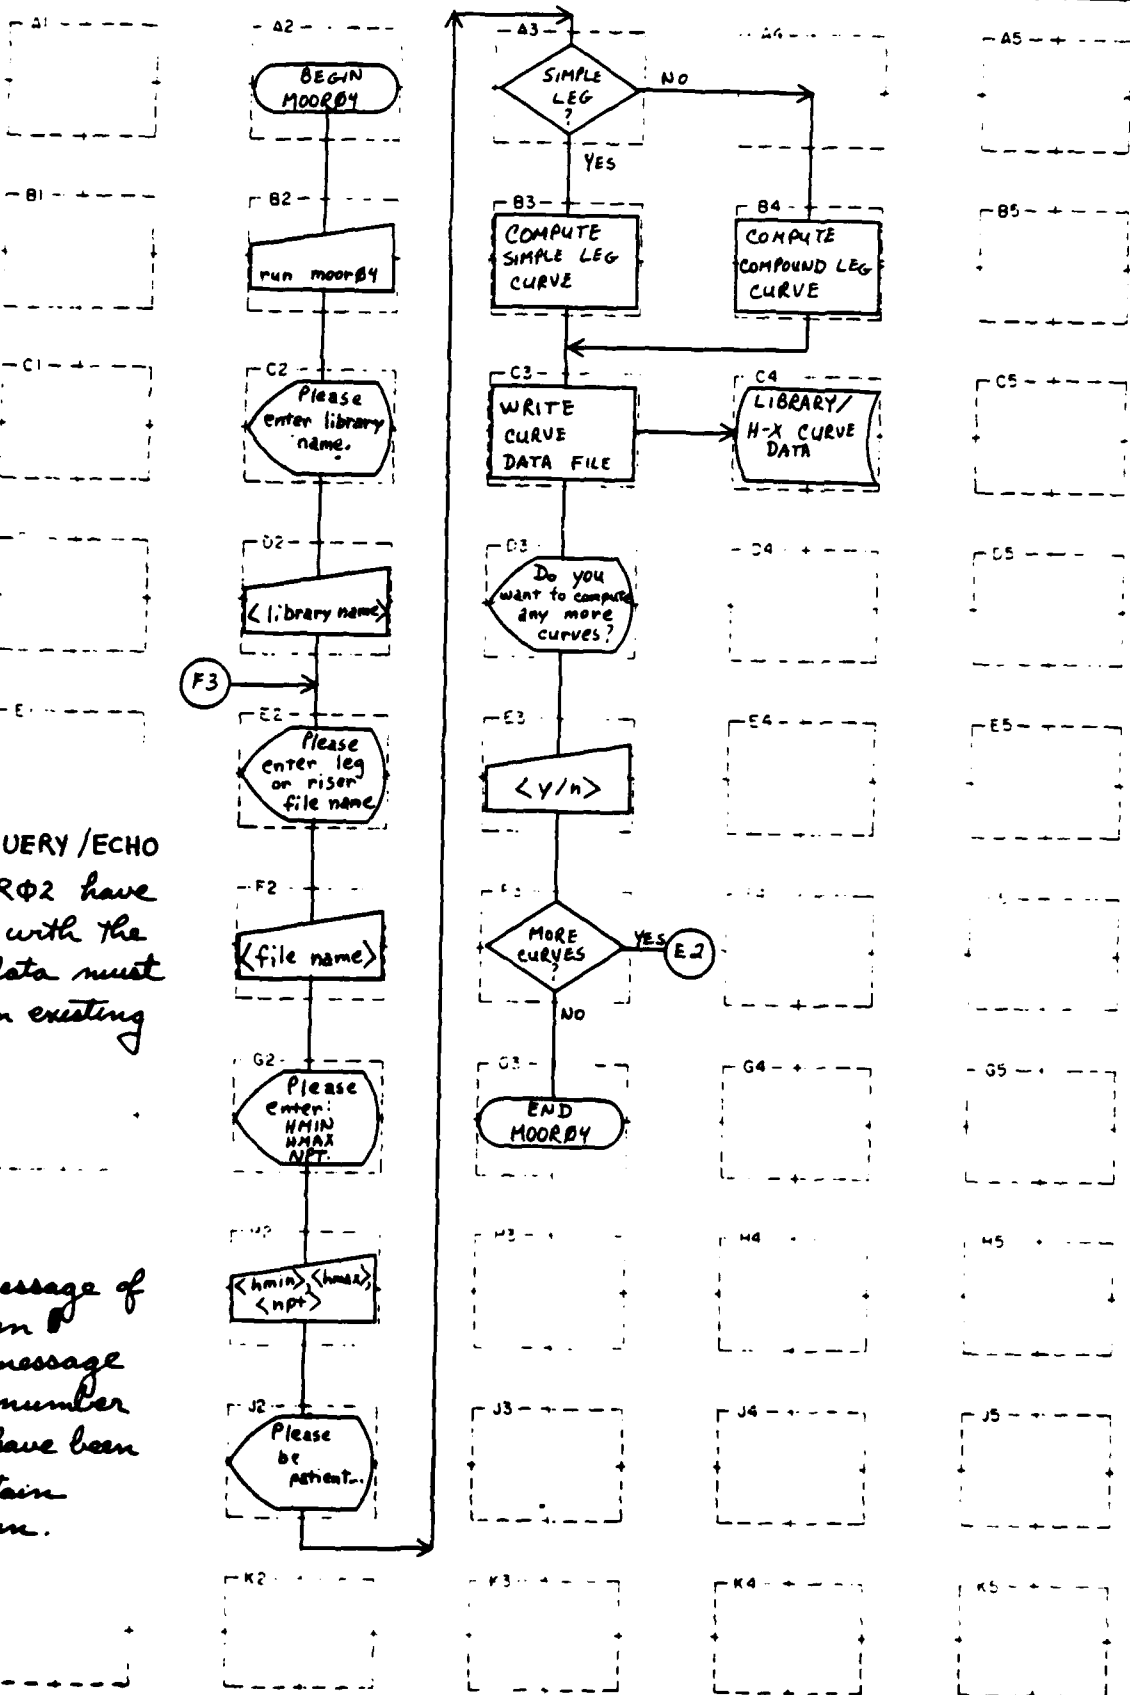

ADDITION: Preceding the opt to begin another run (E4) there is an option to produce a plan view point file. Flowchart section for this would have the same structure as the elevation view section.
